Proposed Change:	<p>In working with my CAIS Inspectors, I have noticed that they print the Complete IU Report for a building when they get ready to go out into the field to perform their inspections. This creates a PDF file that is sorted by the IU numbers smallest to largest. The Inspections will then take the print out and resort the pages into the individual disciplines so that each Inspector will have only the IU's that they need to inspect.</p> <p>Could we request that an option be added to the Report page to sort the PDF file by Discipline or Volume # so that they are grouped already so they don't have to do sorting and grouping themselves?</p>				
Justification:	<p>Reduces time of the CAIS Inspectors sorting the CAIS deficiencies by Volume or by Discipline so that the right Inspector has the paperwork he needs before taking them into the field to perform inspections.</p>
